

Safe, Secure endoscope storage cabinet

# ENDOCAB PLUS

**Enhanced control and traceability for drying and storage of flexible endoscopes.**

“Endoscope must be dried if they are not going to be used for a while, since bacterial growth in a moist endoscope is many times greater than in a dry one. If an endoscope is placed in a drying cabinet, then the potential for bacterial growth must be kept to a minimum. That places strict demands on the features of the cabinet used.”

# Safe, Secure endoscope storage cabinet

## ENDOCAB PLUS

### Features

- Security, Monitoring and Traceability
- Maintaining disinfection level for 72hrs at minimum
- Prevents recontamination and bacterial growth
- Data management system with barcode scanner
- HEPA filter for protection of air quality
- Individual channel air distribution  
with HEPA filter and UV-C treated air
- Air circulation system with temperature controller
- 4.3" color TFT LCD with touch screen display
- Various configuration by user friendly software
- Safety key lock for control touch panel
- Validation process with printer

### Specifications

Description	Endoscope storage cabinet
Scope capacity	7 scopes
Scope arrangement	Vertical hanger with 7 holders
Setting time	Storage time : 72hrs minimum Drying time : 1 min ~ Continuous
Air quality	UV-C treated air with medical grade HEPA filter
Dimension	1370(W) X 550(1100)(D) X 2100(H) mm
Control system	4.3" color TFT LCD touch screen
Internal lighting	High brightness LED lamp (AUTO / MANUAL)
Temperature	Controlled up to 40°C
Channel connection	3 port with connection accessories per scope
Air drying	External surface - Air flow volume : 100cfm Internal surface - Individual channel air drying
Safety function	Door safety key lock Control panel key lock
